

# SPECIAL 150T PERMANENT CHASER

## CHASING EQUIPMENT

### 1 OVERVIEW

The Permanent Chain Chaser is used on semi-submerged rigs to prevent anchors from having to be buoyed off for recovery. The material of the Permanent Chaser is softer than the wire or chain. This is to make the chaser sacrificial between the two so that the chain or wire does not get damaged. This is used as an alternative to the buoy and pennant.
